Billboard Setup

to be used in conjunction with the included (BillbordScreenScrolling)

1) Select the number of adverts you wish to cycle through using the adverts array.

2) Add an image texture to each array in the advert slot.

3) Pick an average color for each advert (if using light for illumination)

4) If you are using a light source then you will need to add that to the main light slot.

5) Set the minimum and maximum time (in seconds) you wish to display the advert.
